

Surface Logging Services

Surface Logging Overview

Reservoir Ops Center

- Remote Mud Logging
- Remote Geosteering
- In-Office Geosteering
- Well Planning
- Geomechanics
- Engineered Completions

Offshore Services

- Mud Logging
- Pore Pressure Monitoring
- Drilling Hazard Mitigation
- Rig Monitoring System
- Wellsite Geologist

Advanced Geoscience

- Pyrolysis/TOC
- Capillary Suction Test
- Formation Stability Test
- XRD/XRF
- Wellsite or Lab
- Geochemical Analysis

Onshore Services

- Mud Logging
- AWD
- Mass Spectrometry
- Wellsite Geologist
- Rig Monitoring System
- Onsite Geosteering

Mudlogging, Geosteering, and Advance Geosciences

Reservoir Group's surface logging solutions provide real-time insight into the formation to help maximize production. Our advanced formation evaluation analysts provide extensive expertise in the analysis and interpretation critical data sets for well-specific decisions for a complete formation characterization to increase drilling efficiencies.
